

Introducing the enhanced Terraforma CON29M and Ground Report

Now live - Terraforma's leading CON29M and Ground Report has been improved to aid conveyancers as part of their 2021 Autumn updates.

NEW! The Terraforma official CON29M clearly provides advice and assesses the risk from non-coal workings within its own section, and alerts all parties to the implications of non-coal workings affecting the property, importantly how the Coal Mining Subsidence Act 1991 may not apply.

NEW! Site plans, which allow conveyancers and homebuyers to visualise the potentially affected areas from natural ground perils, clay subsidence, coastal erosion and mining hazards, have been improved for usability.

Let us know what you think - scan the QR code below with your smart phone camera to be in with the chance to win a £50 voucher.
