Groundsure

LOCATION INTELLIGENCE

We are a UK authority on environmental and mining risks including, but by no means limited to, **land contamination, flooding and ground stability**. We provide high value, property-specific opinions and analysis of land use based on leading datasets that we collect and curate working with leading data providers across the UK. Groundsure is part of ATI Global - the world-class provider of legal technology, software and information services.

Avista - Ten conveyancing searches in one

Now including a full mining search (where applicable), Avista is the most comprehensive environmental search report available at leading search providers.

Groundsure Avista offers ten key environmental searches including planning, intelligently filtered to produce the most comprehensive risk report on the market. Avista's plain English explanations and accessible design make it quicker and easier to review.
